Latest ISSUE Released at 11:30 AM (CANBERRA TIME) 29/08/2003 Ceased

---

## Summary

### About this Release

#### ABOUT THIS RELEASE

The Experimental Composite Leading Indicator (XCLI) is a single time series designed to provide early signals of turning points in the Australian business cycle.

The XCLI has been developed to supplement rather than to compete with existing forms of economic analysis and forecasting. It is updated each quarter, the results of which are reported each quarter in the Australian Economic Indicators.
